## RoboCrib® TX750

A breakthrough in Industrial Vending Technology! The RoboCrib® TX750 is the first machine that is specifically designed to dispense square or rectangular boxes or packages almost eliminating the need for repackaging items.

## RoboCrib® VX 500 and VX 1000

The most flexible and most capable machines on the market. Secure and manage the issue and return of items using the latest in smart carousel technology. Can hold up to 628 SKUs for the RoboCrib® VX 500 and 1048 SKUs for the RoboCrib® VX 1000.

## AutoLocker® FX

This is the first and only locker system on the market designed to be completely modular in every way allowing you to build a custom configured locker system for the unique needs of your company. The AutoLocker® FX also provides optional 110VAC power outlets so power tools, laptops, etc can be dispensed with the longest charge.

## RoboCrib® LX2000

Similar to the VX 500 and VX 1000 in its ability to manage the issues and returns with the latest in smart carousel technology, as well as serial and gage management. But this RoboCrib® can hold a whopping 2574 SKUs making it the largest vending machine on the market.

## MobileCrib

This convenient handheld device gives storeroom attendants the ability to scan barcodes to perform most common transactions. This device eliminates paper tracking with a more accurate process without being tethered to a computer terminal. The MobileCrib allows all of the tracking functions of a RoboCrib® in a convenient handheld device.

## Touch Tool Room
