

DXP and PMI have aligned to better meet your service, repair and pump packaged needs for any pump application.

This union has allowed DXP to expand its services to offer new and remanufactured pumps covering low flow reciprocating pumps to high flow centrifugal pumps, DXP and PMI together provide expanded capabilities to meet your needs.

PMI brings an extensive inventory of centrifugal pumps that can be remanufactured and packaged with drivers for EOR, Pipeline and Refinery process applications. Our inventory consists of various major manufacturers of horizontal split case multi-stage, vertical and horizontal process pumps conforming to API and ANSI standards.

Innovative Pumping Solutions

Power Machinery

Expanded Capabilities To Meet Your Needs:

- Quick turn around on remanufactured pumps
- Extended application coverage
- Full turn key services
- Removal and installation
- Engineered upgrades
- Extensive inventory of new and used pumps
- Large inventory of parts
- Custom fabrication and packaging

About PMI

PMI has been serving the petroleum, pipeline and power industries through worldwide sales and service of centrifugal pumps since 1971.

PMI receives worldwide inquiries from customers needing quick delivery for their pumping needs. Operating from an inhouse inventory of over 800 pipeline, refinery, water flood and process pumps, PMI can provide:

- Fully packaged systems
- Very short delivery times
- Compliance with industry quality standards
- Compliance with technical specifications
- Body of experienced specialists
- Engineered re-rates and modifications for existing pumps
- Same as new warranty

PMI operates from an inhouse inventory of over 800 pipeline, refinery, water flood and process pumps

Capabilities

PMI provides fabrication and packaging of specialty pumping units for specific applications

PMI has a complete inhouse machine shop for the manufacturing of:

- Pumps
- Pump parts
- Related equipment

As well as a complete fabrication shop for:

- Custom packaging
- Skids & Baseplates
- Piping systems

PMI's packaging is complemented by their fabricating capabilities for baseplates, metering skid modules, piping and support systems.

PMI provides fabrication and packaging of specialty pumping units for job specific applications. Their remanufacturing capabilities start with utilizing their inventory as raw castings for complete re-application.

Field Services

PMI offers a large inventory of centrifugal pumps as well as a broad spectrum of services provided by PMI's manufacturing facilities and experienced professionals who are dedicated to quality and compliance with industry standards.

To minimize downtime, PMI offers around the clock emergency parts and repairs to keep pumps operating during critical service instances.

PMI provides specialists to perform start-ups, trouble shoot problems and perform maintenance and in-field pump repair any place in the world.

PMI's service professionals are used on major pipelines around the world. They work on the job site providing full maintenance for all rotating equipment, saving the pipeline's operator added overhead.
